Objective:

To improve nutrition and health outcomes of CARICOM populations through an integrated, gender equal, environmentally sustainable systems approach to food availability and access, and food safety and quality.

Learning outcomes:

- Improved nutrition, particularly among children and women, through changes in school lunch programmes and nutrition education
- Change in consumer behaviour towards increased consumption of a diversified diet of vegetable and fruits, with implications for obesity and diet related diseases
- Agricultural diversification and improved water resources management leading to increased year-round supply of locally grown farm produce
