DEPARTMENT OF PHARMACOLOGY

REPORT

SEMINAR ON PHARMACOVIGILANCE

VENUE: SEMINAR HALL

DATED: 30/12/2019

RESOURCE PERSONS:

1. Mr.G.Muthukumar, M.PHARM.,

Associate professor, JKKMMRF'S Annai JKK Sampoorani Ammal college of pharmacy, komarapalayam.

2. Mr.N.Deepan., M.PHARM.,

Assistant professor, JKKMMRF'S Annai JKK Sampoorani Ammal college of pharmacy, komarapalayam.

No. of students enrolled: 260

No. of students certified: 258

No. of students certified in our Institution : 18

Objective

Pharmacovigilance is related to the detection, assessment, understanding and prevention of any drug related adverse effects. These soft skill development program provides additional knowledge to the students other than their academic knowledge.

Learning outcomes:

- Identify adverse drug reactions and manage it.
- Develop and establish pharmacovigilance program in an organization.
- Explain importance of safety monitoring of Medicine.

Respected Sir,

Sub: Requesting permission to conduct Workshop on **Pharmacovigilance** regarding:-

With due respect, we kindly request you to grant us permission to conduct a seminar on **11/12/2019 to 12/12/2019** in the topic Workshop on **Pharmacovigilance**. We believe this will be informative session and useful for our students.

Kindly consider the above, we will be grateful to you sir.

Thank you

Yours sincerely,

**Dr. N. SENTHILKUMAR,
PRINCIPAL,**

Workshop on Pharmacovigilance

Introduction

Adverse drug reactions (ADRs) have been defined by the World Health Organization (WHO) as: "a response to a drug that is noxious and unintended and occurs at doses normally used in man for the prophylaxis, diagnosis or therapy of disease, or for modification of physiological function". According to WHO, Pharmacovigilance (PV) is defined as "the science and activities related to the detection, assessment, understanding and prevention of adverse drug effects or any other possible drug-related problems".

Overview of Pharmacovigilance

Medicines are chemicals or compounds used to cure, decrease or prevent disease, ease symptoms or help in the diagnosis of illness. Consuming a medicine is equivalent to consume a risk, because no medicine is absolutely safe and all pose some health risks. These risks are mild in most cases but have the potential to cause disability or even death. The decision whether medicine can be taken or not depends on benefits and risks ratio. The product will be available in market if the benefits associated with medicine outweigh the risk. Hence drug safety monitoring and risk management are vital for manufacturers and regulatory authorities.

Aims of Pharmacovigilance:

1. To improve patient care about drugs and keep the patient safe from adverse effects of medicines, and all medicinal and paramedical interventions.
2. To contribute to the assessment of benefit, risk and effectiveness of medicines.
3. To promote understanding, education and training about this field and its effective communication to health professionals and public.
4. To encourage safe and rationale use of medicines.

Objective of Pharmacovigilance:

1. To detect the new adverse effects, drug interactions and contraindications.
2. Communication of information about adverse events so that they occur less frequently.
3. Reevaluation of risks and benefit ratio for effective use of medicines in patients to reduce side effects and more benefits.
4. Identification of mechanisms that cause adverse effects of drugs.
