VENUE: SEMINAR HALL

DATED:30/07/2019

RESOURCE PERSONS:

1. Dr.V.Suresh, M.PHARM, Ph.D.,

PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

2. Mr.N.Deepan., M.PHARM.,

ASSISTANT PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

No. of students enrolled: 58

No. of students certified: 50

No. of students certified in our institution: 16

Objective

Any systematic investigation towards increasing the sum of knowledge can be termed as research. These soft skill development program provides additional knowledge to the students other than their academic knowledge.

Learning Outcomes provide knowledge on Research Methodologies and design aspects.

- > To get knowledge to the participants to how to write scientific manuscripts writings
- > To provide hands on training on data analysis tools

Seminar on Selecting an appropriate research design

Introduction

Research is a careful and systematic way of solving problems and gaining new knowledge. Research can also be defined as being a systematic process of discovery and advancement of human knowledge. It should solve a problem or make an innovative contribution to the existing body of knowledge. For something to be counted as research, it has to be systematic and methodical in its approach and procedures and has to meet relevant norms and standards for validity and reliability.

Design is basically concerned with the aims, uses, purposes, intentions and plans within the practical constraint of location, time, money and the researcher's availability. Research design is a reflection upon a researcher's ideas. It helps prevent frustration by binding the research together through a structure plan that show how all the major parts of the research work in unison to try to address the research questions.

The concept of research has to be understood by a researcher so as to understand which research methods and techniques to adopt, how to use them and where they will fit in the overall research process. A researcher requires sufficient knowledge of research design and its significance in research so as to overcome the challenges of selecting the research method and techniques to adopt in a research.

Quantitative Research Design

Experimental

- True experiment
- Quasi-experiments

Non-Experimental

- Survey Research
- Causal-comparative research
- Correlation design

Qualitative Research Design

- Case studies
- Narrative Research
- Phenomenological Research
- Grounded theory
- Ethnography
- Action Research
