DEPARTMENT OF PHARMACOLOGY

REPORT

WORKSHOP ON NEURODEGENERATIVE DISORDERS

VENUE: SEMINAR HALL

DATED:6&7/09/2017

RESOURCE PERSONS:

1. Mr.G.Thamotharan, M.PHARM.,
ASSOCIATE PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANIAMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

2. Mr.N.Deepan., M.PHARM.,
ASSISTANT PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANIAMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

No. of students enrolled: 58

No. of students certified: 56

No. of students certified in our institution:19

Objective

Neurodegenerative disorders are illnesses characterized by a loss of nervous system functioning that are usually caused by neuronal death. These soft skill development program provides additional knowledge to the students other than their academic knowledge.

Learning outcomes:

- Identify key characteristics of neurodegenerative disorders
- Identify symptoms of neurodegenerative disorders
- Therapeutic approaches in neurodegenerative disorders

Respected Sir,

Sub: Requesting permission to conduct **Workshop on Neurodegenerative disorders** regarding:-

With due respect, we kindly request you to grant us permission to conduct a seminar on **06/09/2017 to 07/09/2017** in the topic **Workshop on Neurodegenerative disorders** .We believe this will be informative session and useful for our students.

Kindly consider the above, we will be grateful to you sir.

Thank you

Yours sincerely,

Dr. N. SENTHILKUMAR,
PRINCIPAL,

JKK MUNIRAJAH MEDICAL RESEARCH FOUNDATION
ANNAI JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY,
ETHIRMEDU, KOMARAPALAYAM - 538 183,

DEPARTMENT OF PHARMACOLOGY

CIRCULAR

2020

This is inform to the students that the following soft skill development course can be conducted by the Department of Pharmacology, JKKMMRF'S Annai JKK Sampoorani Ammal College Of Pharmacy, komarapalayam and it will be commenced as per the schedule:

Course Name	Date	FN	AN	Venue	Resource Person
Workshop on Neurodegenerative disorders	06/09/2017 to 07/09/2017	IV B. PHARM	II & III PHARM.D	SEMINAR HALL	Mr.G.Thamotharan & Mr.N.Deepan

All the above-mentioned students must enroll and actively participate in the course without fail.

NOTE: Certificates should be issued to all the students after completion of the course and examination.

Workshop on Neurodegenerative disorders

Introduction

Neurodegenerative diseases, such as Alzheimer's disease, Parkinson's disease, amyotrophic lateral sclerosis (ALS), and frontotemporal dementia (FTD), are becoming increasingly prevalent due to an aging population.

Research on neurodegenerative diseases has expanded greatly over the past four decades. Nevertheless, fundamental questions remain about the biology of these diseases, and further insights into the mechanisms of these diseases would help to inform the development of effective means to prevent and to efficiently treat them. Traditionally, research and development efforts for neurodegenerative diseases have primarily considered individual diseases separately, and largely separate research communities and patient advocacy groups have emerged. Recent findings, however, have revealed certain commonalities in genetic and cellular mechanisms across neurodegenerative diseases. These findings suggest that it might be valuable—at least in some cases—to change the traditional way of studying these diseases by no longer seeing each as an independent entity, but rather as clinical variants of common cellular and molecular biological defects. This approach could help enhance basic scientific understanding of neurodegenerative disease, and could help with the development of biomarkers and new therapeutics.

Objectives

Looking across the neurodegenerative diseases, workshop presentations and discussions aimed to do the following:

- Identify and discuss commonalities related to genetic and cellular mechanisms;
- Identify areas of fundamental science needed to facilitate therapeutics development; and
- Explore areas of potential collaboration among the respective research communities and sponsors.

Workshop presentations and discussions were organized around four topics:

- (1) protein aggregation and cellular mechanisms to prevent or eliminate it;
- (2) neurodegenerative disease transmission and immune therapy;
- (3) mitochondrial pathology in neurodegenerative disease; and
- (4) errors in RNA processing.

The need for a deeper understanding of cellular and molecular mechanisms, including those that may be common across neurodegenerative diseases:

Protein aggregation is a well-known commonality across many neurodegenerative diseases; mitochondrial dysfunction has been found across neurodegenerative disorder.
