DATE: 05/08/19

DEPARTMENT OF PHARMACEUTICAL CHEMISTRY

REPORT

SEMINAR -Qualitative & Quantitative Research

VENUE: SEMINAR HALL

DATED: 26/07/19-27/07/19

RESOURCE PERSONS:

**Dr. K. SRINIVASAN, M.PHARM, Ph.D
NANDHA COLLEGE OF PHARMACY, ERODE..**

No. of students enrolled: 350

No. of students certified: 350

No. of students certified in our institution: 35

Introduction:

The seminar on Qualitative research and Quantitative Research was held on July 26th and 27th, 2019 at JKKMMRF's AnnaiSampooraniammal College of Pharmacy. The seminar was organized by the Department of Pharmacy, and a total of 350 students participated. The purpose of the seminar was to provide attendees with an introduction to the basics of qualitative research and to introduce them to the use of qualitative and quantitative research as a tool for analyzing and organizing qualitative data. At the end of the seminar, all attendees received a certificate of completion.

Objectives:

The main objectives of the seminar were to:

- Introduce attendees to the principles of Quantitative Research deals with numbers and statistics, while Qualitative Research deals with words and meanings.
- Provide an overview of the different types of qualitative data and how to collect and analyze them
- Introduce attendees to the use of QUALITATIVE & QUANTITATIVE RESEARCH for organizing and analyzing qualitative data
- Provide attendees with the opportunity to practice using QUALITATIVE & QUANTITATIVE RESEARCH through hands-on exercises

Participants:

The seminar was open to all students of JKKMMRF's AnnaiSampooraniammal College of Pharmacy, and a total of 350 students participated. The attendees represented a range of academic disciplines within the field of pharmacy, including pharmacology, pharmaceutical chemistry, and pharmacy practice. Most of the attendees had some prior experience with

ETHIRMEDU, KOMARAPALAYAM - 638 183.
NAMAKKAL DISTRICT, TAMILNADU**

qualitative research, but some were new to the field.

Format:

The seminar was structured as a combination of lectures, group discussions, and hands-on exercises. The lectures were led by an experienced researcher with expertise in qualitative research and quantitative research, and the hands-on exercises were led by a trained facilitator. The seminar was held over two full days, with breaks in between to allow attendees to rest and ask questions.

Content:

The seminar covered a range of topics related to qualitative research and quantitative research. On the first day, attendees learned about the different types of qualitative data, including interview transcripts, focus group transcripts, and observational field notes. They also learned about the different approaches to analyzing qualitative data, including coding, memoing, and categorizing. On the second day, attendees learned to organize and analyze their qualitative data, including importing data, coding text, and creating visualizations.

Evaluation:

At the end of the seminar, attendees were asked to complete a short evaluation form to provide feedback on the seminar. Overall, the evaluations were very positive, with most attendees rating the seminar as "excellent" or "good." Attendees commented that the lectures were clear and well-organized, and that the hands-on exercises were helpful in providing a practical understanding of QUALITATIVE & QUANTITATIVE RESEARCH.

Conclusion:

Overall, the seminar on qualitative research and quantitative research was a success. A total of 350 students participated, and all attendees received a certificate of completion. The positive feedback from attendees suggests that the seminar met its objectives and was well-received by the participants. The skills and knowledge gained from the seminar will be valuable to the students as they continue their studies and pursue careers in the field of pharmacy.

Recommendations:

Based on the evaluations and feedback from attendees, we recommend offering similar workshops in the future to continue to build capacity in qualitative research and quantitative research at JKKMMRF's AnnaiSampooraniAmmal College of Pharmacy. It may also be helpful to consider offering more advanced seminar for those who have already completed the basic seminar and are looking to further develop their skills.

Respected Sir,

Subject: Letter for requesting Permission to conduct seminar regarding:-

We are writing this letter to request permission to conduct a seminar in the Seminar hall for two days, on 26/07/19 and 27/07/19. We wish to conduct the seminar on **Qualitative & Quantitative Research**. We believe that this will be a very informative session that many students will wish to attend.

We request you to kindly permit to conduct training program as this would be a great opportunity for Students to learn all about **Qualitative & Quantitative Research** that would help to shape the students.

Looking forward for your approval .

Thank you

Yours sincerely,

**Dr. N. SENTHILKUMAR,
PRINCIPAL,**

Circular

This is to inform all the students of our college that the seminar on Qualitative and Quantitative Research for the academic year 2019-2020 will be commenced on 26/07/19 and 27/07/19 for all the batches. Hence request all the interested candidates to register for the seminar.

Course Name	Schedule	Venue	Resource Person
Qualitative & Quantitative Research	26/07/19 to 27/07/19	SEMINAR HALL	Dr.K.Srinivasan

All the above mentioned students must enrol and actively participate in the course without fail.

NOTE: Certificates should be issued to all the students after completion of the course and examination.

ABOUT THE TOPIC

QUALITATIVE AND QUANTATIVE RESEARCH

Quantitative research is expressed in numbers and graphs. It is used to test or confirm theories and assumptions. This type of research can be used to establish generalizable facts about a topic.

Common quantitative methods include experiments, observations recorded as numbers, and surveys with closed-ended questions.

Quantitative research is at risk for research biases including information bias, omitted variable bias, sampling bias, or selection bias.

Qualitative research is expressed in words. It is used to understand concepts, thoughts or experiences. This type of research enables you to gather in-depth insights on topics that are not well understood.

Common qualitative methods include interviews with open-ended questions, observations described in words, and literature reviews that explore concepts and theories.

Qualitative research is also at risk for certain research biases including the Hawthorne effect, observer bias, recall bias, and social desirability bias.

Quantitative research

Focuses on testing theories and hypotheses

Analyzed through math and statistical analysis

Mainly expressed in numbers, graphs and tables

Requires many respondents

Closed (multiple choice) questions

Key terms: testing, measurement, objectivity, replicability

Qualitative Research

Focuses on exploring ideas and formulating a theory or hypothesis

Analyzed by summarizing, categorizing and interpreting

Mainly expressed in words

Requires few respondents

Open-ended questions

Key terms: understanding, context, complexity, subjectivity
