DEPARTMENT OF PHARMACOLOGY
REPORT

WORKSHOP ON ZIBRA FISH AS A EXPERIMENTAL MODEL VENUE: SEMINAR HALL

DATED:31/12/2021

RESOURCE PERSONS:

1. Dr.V.Suresh, M.PHARM, Ph.D.,

PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY,
KOMARAPALAYAM

2. Mr.G.Thamotharan., M.PHARM.,

ASSOCIATE PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

No. of students enrolled: 263

No. of students certified in our institution :17

No. of students certified: 258

Objective

Zebrafish has become a prominent vertebrate model for understanding pathophysiology of disease and has already contributed to several examples of successful phenotype-based drug discovery. These soft skill development program provides additional knowledge to the students other than their academic knowledge.

Learning outcomes:

- Provides knowledge on Zebrafish as a model for drug discovery platform.
- Identify potential issues with Zebrafish animal model.
- It Provides More Effective biomarker in pathophysiology of disease

Respected Sir,

Subt: Requesting permission to conduct orkshop on **Zibra fish as a experimental model** regarding:-

With due respect, we kindly request you to grant us permission to conduct a seminar on **15/12/2021 to 16/12/2021** in the topic **Workshop on Zibra fish as a experimental model** .We believe this will be informative session and useful for our students.

Kindly consider the above, we will be grateful to you sir.

Thank you

Dr. N. SENTHILKUMAR,
PRINCIPAL,

Yours sincerely,

JKK MUNIRAJAH MEDICAL RESEARCH FOUNDATION
ANNAI JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY,
ETHIRMEDU, KOMARAPALAYAM - 638 183.

DEPARTMENT OF PHARAMACOLOGY

CIRCULAR

2021

This is inform to the students that the following soft skill development course can be conducted by the Department of Pharmacology, JKKMMRF'S ANNAI JKK SAMPOORANIAMMAL COLLEGE OF PHARMACY, KOMARAPALAYAM and it will be commenced as per the schedule:

Course Name	Date	FN	AN	Venue	Resource Person
Seminar on Zibra fish as a experimental model	15/12/2021 to 16/12/2021	IV B.PHARM	II B.PHARM	SEMINAR HALL	Dr.V.Suresh & Mr.G.Thamotharan

All the above-mentioned students must enroll and actively participate in the course without fail.

NOTE: Certificates should be issued to all the students after completion of the course and examination.

Workshop on Zibra fish as a experimental model

Introduction

This is a two day workshop intended to help you understand the use of zebrafish (*Daniorerio*) models in scientific research and to provide training in development of zebrafish models. The workshop includes introductory lectures on zebrafish models and hands-on practical sessions on induction of zebrafish models.

Zebrafish has become a prominent vertebrate model for understanding pathophysiology of disease and has already contributed to several examples of successful phenotypebased drug discovery. By combining the scale and throughput of in vitro screens with the physiological complexity of animal studies, the zebrafish promises to contribute to several aspects of the drug development process including target identification, disease modelling, lead discovery and toxicology

Objectives

- Demonstrate a hands on method in using zebrafish as a discovery platform
- Make zebrafish models as per the latest industry and research trends
- Read end points from zebrafish model to discover market fit drugs

Exploratory-Based Models

Zebrafish behavioral assays are currently used for high-throughput phenotyping and testing of various psychotropic drugs. A popular method of behavioral analysis in zebrafish research is the novel tank test, conceptually similar to the open field test used for rodents, which exhibit anxiety-like behavior by staying close to the walls (thigmotaxis), but increase exploration as they become acclimated to the new environment. Similarly, exposure to a novel environment evokes a robust anxiety response in zebrafish, as they dive to the bottom (geotaxis) until they feel safe to swim in the upper regions of the tank. Typical endpoints in this test include the latency to enter the top, the number of transitions to the top, time spent in top, top:bottom time ratio, the number of fear/escape-like erratic movements, as well as freezing frequency and duration.

Zebrafish habituation behavior

Relevant to both exploration and emotionality, habituation is the simplest form of learning, and has long been used to examine animal cognitive phenotypes. Habituation to novelty represents attenuation of innate behaviors, as subjects become accustomed to the environment. Intra-session habituation reflects spatial working memory, whereas inter-session habituation is commonly used to assess middle- and longterm spatial memory. Despite being widely studied in various rodents, habituation has not been extensively evaluated in zebrafish until recently
