The text explores the use of a variety of analytical tools to characterize biological samples. The contributors explain how to identify and quantify biochemically important molecules, including small molecules as well as biological macromolecules such as enzymes, antibodies, proteins, peptide and nucleic acids. This book is filled with essential knowledge and explores the skills needed to carry out the research and development roles in academic and industrial laboratories.

Teja Kumar Reddy Konatham

Teja Kumar Reddy Konatham (M.Pharm, Ph.D.) Received M.Pharmacy from University college of technology, Osmania University, Hyderabad & under graduation from J.N.T.U Hyderabad, Telangana.
