

# ERP- ENTERPRISE RESOURCE PLANNING SOFTWARE

## Introduction

Enterprise Resource Planning software is a complete solution specially developed for colleges and universities. This advanced software has all the features incorporated, which are needed to handle all the required activities.

College can manage activities like student attendance, fee, exam, library records and much more. College Management solution is designed in order to minimize the complexity faced by colleges to manage odd-even semester simultaneously. This is easy to install and ready to use college management system configured with all type of operating system (Web) and Mobile (android) devices. With this reliable and secure solution, the college can now achieve the goal of becoming a paperless organization.

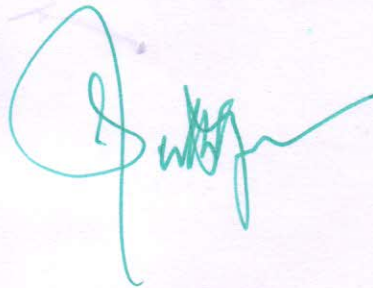

Scroll down to get detail information about the features and functions of College Management software.
