### 1. Policy document on environment and energy usage

Energy and environmental conservation are critical for long term viability. JKKMMRF's college believes that an environment and energy consumption policy may significantly contribute to environmental conservation via efficient energy use and so serve the cause of environment in a dedicated manner. Various efforts have been taken by the college to utilize the solar energy in an effective way based on its unique infrastructure.

Besides these various measures are taken to reduce the power consumption in our campus. It includes the provision of On-grid solar roof top panel, they can produce average solar energy of 10kw. Biogas plant has been installed backside of the hostel mess for waste management with the capacity of 20kg/day and also produce gas to used as cooking fuel. In addition sensor and LED pulps are used for energy saving electricity.

#### Objectives:

Reduce energy usage on campus.

We use alternative energy source for energy demand.

#### Green audit:

The institution has a green audit performed on a regular basis by an approval energy.

#### Energy audit:

The institution has energy audit conducted by authorized auditors/auditing agency to find out the status of energy utilization of the college.

#### Environment audit:

Along with green audit, the institute also conduct environment audit on regular basis, the parameters like air, soil, noise and water qualities are to be taken into consideration for maintaining clean environment of the college campus.
