REPORT

SEMINAR ON NUTRACEUTICALS WITH PHARMACEUTICS: ITS IMPORTANCE'S AND THEIR APPLICATION

RESOURCE PERSONS

1. **Dr.S. CHANDRA., M. PHARM, Ph.D.,**
PROFESSOR AND HOD,
JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY,

2. **Mr.R. SURESH., M. PHARM.**
ASSOCIATE PROFESSOR,
DEPARTMENT OF PHARMACEUTICS,
JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY,
KOMARAPALAYAM-638183

No. of students enrolled: 455

No. of students certified: 430

No. of students certified in our institution : 75

Objective: Nutraceuticals is derived from the amalgamation of the term nutrition and pharmaceutical and was coined by Stephen De Felice in 1989. He defined nutraceutical as, "a food (or part of a food) that provides medical or health benefits, including the prevention and/or treatment of a disease" However the terminology is not very popular globally and is mostly substituted by the term "dietary supplements" to meet the stringent regulatory requirements. But microscopically cross-sectioning of both the terms reveals some basic differences like nutraceuticals should always aid in disease prevention or treatment rather than only supplementing the diet

Learning outcomes:

Nutraceutical products provide several pharmacological benefits like anti-aging, protection against some chronic diseases, maintaining body homeostasis, cardiovascular diseases, neurodegenerative diseases, metabolic disorders like diabetes, degenerative diseases like cancer, protein deficiency, ophthalmic complications, allergic problems, and Parkinsonism This part of this chapter will provide an insight into the contribution of nutraceuticals for management of diverse clinical conditions.

Subject: Letter for requesting Permission to Conduct on two days seminar regarding: -

Respected Sir,

We are writing this letter to request permission to conduct a one-day seminar in the SEMINAR HALL on 20.10.2022 & 21 .10.2022. We wish to conduct seminar regarding the **Nutraceuticals with pharmaceutics: Its importance's and their applications.**

We request you to kindly permit to conduct seminar program as this would be a great opportunity for Students to learn and that would help a great deal to shape the students.

Looking forward to hearing from you.

Thank you

DEPARTMENT OF PHARMACEUTICS

TWO DAYS SEMINAR ON: Nutraceuticals with pharmaceutics: Its importance and their Applications

ABOUT THE SEMINAR

Modern day work profile has led to the development of a new set of diseases popularly termed as life–style disorders. The common causative agents of these types of disorders are improper diet and dependence on fast foods, lack of physical inactivity, non-alignment with biological clock, incorrect body posture, excessive stress and inadequate rest. Nutraceuticals represent a unique blend of modern science and natural agents and perhaps the best possible solutions for management of lifestyle diseases. Besides these lifestyle disorders are also considered responsible for the predisposition of several complex clinical conditions. Diverse marketed nutraceuticals variants can also help to block the transformation of life style disorders into fatal diseases. Consumer acceptance of nutraceuticals started gaining from 1980 onwards when scientists started indulging into efficacy evaluations of such products followed by their representation in mass media. Other factors like steep rise in medical management costs, increased life expectancy, increased health awareness and available scientific data confirming health benefits of nutraceuticals have also contributed to consumer acceptance of such products. Global nutraceutical market which was approximately 400 billion USD in 2019 is expected to cross nutraceuticals product bouquet along with a healthy pipeline of innovative products booming the market are all contributors to the predicted growth. The entry of generic products may cause a dip in nutraceutical product costs but because of high consumer acceptance, the overall market for such products is expected to remain stable.

Nutraceutical products provide several pharmacological benefits like anti-aging, protection against some chronic diseases, maintaining body homeostasis, cardiovascular diseases, neurodegenerative diseases, metabolic disorders like diabetes, degenerative diseases like cancer, protein deficiency, ophthalmic complications, allergic problems and Parkinsonism. This part of this chapter will provide an insight to the contribution of nutraceuticals for management of diverse clinical conditions.
