REPORT

WORKSHOP TITLE - ROLES AND RESPONSIBILITIES OF PHARMACIST IN ANTIBIOTIC PROPHYLAXIS

VENUE: SEMINAR HALL

DATED: 10.11.2022– 11.11.2022

RESOURCE PERSONS:

1.Dr. R.DILEEP.,PHARM.D

ASSISTANT PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

2. Dr.ATHIRA RAJKUMAR.,PHARM.D

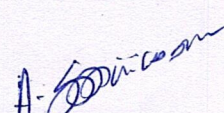

ASSISTANT PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

No. of students enrolled: 350

No. of students certified: 348

No. of students certified in our institution: 74

Antibiotic prophylaxis is defined as the administration of antibiotics before contamination by surgical incision has occurred and is given with the intention of preventing infection. Antibiotics are medicines used to prevent and treat bacterial infections. Antibiotic usage is increasing rapidly day by day with or without prescription. Irrational prescription usage, negligence of standard guidelines and antimicrobial resistance are increasing complexity in the therapy and the desired outcome. The aim of antibiotic prophylaxis in surgery is to prevent SSI whilst minimizing the collateral damage that occurs with all antibiotic use.

Subject: Letter for requesting Permission to Conduct workshop regarding:-

Respected Sir,

We Are writing this letter to request permission to conduct a workshop in the Seminar hall for two days on 10/11/2022 & 11/11/2022. We wish to conduct the workshop on **Roles and Responsibilities of Pharmacist in Antibiotic Prophylaxis**. We believe that this will be a very informative session that many students will wish to attend.

We request you to kindly permit to conduct training program as this would be a great opportunity for Students to learn all about Roles and Responsibilities of pharmacist in Antibiotic Prophylaxis that would help to shape the students.

Looking forward for your approval.

Thank you

Dr. N.SENTHILKUMAR,

The workshop on Roles and Responsibilities Of Pharmacist In Antibiotic Prophylaxis was held on November 10th and 11th, 2022 at JKKMMRF's Annai Sampoorani Ammal College of Pharmacy. The workshop was organized by the Department of Pharmacy, and expecting maximum number of student participation. The purpose of the workshop was to provide attendees with an introduction to the basics of qualitative research and to introduce them to the Irration usage of Antibiotics. At the end of the workshop, all attendees received a certificate of completion.

Objectives:

The main objectives of the workshop were to:

- Introduce attendees to the principles and practices of Antibiotics
- Provide an overview of the different types of Antibiotics and its usages
- Introduce attendees to the Importance and Goals of antibiotic prophylaxis

ABOUT THE TOPIC

ANTIBIOTIC PROPHYLAXIS

Antibiotic prophylaxis is defined as the administration of antibiotics before contamination by surgical incision has occurred and is given with the intention of preventing infection. Antibiotics are medicines used to prevent and treat bacterial infections. Antibiotic usage is increasing rapidly day by day with or without prescription. Irrational prescription usage, negligence of standard guidelines and antimicrobial resistance are increasing complexity in the therapy and the desired outcome. The aim of antibiotic prophylaxis in surgery is to prevent SSI whilst minimizing the collateral damage that occurs with all antibiotic use.

Goals Of Antibiotic Prophylaxis

- Reduce The Incidence of surgical site Infection (SSI)
- Minimize the effect on the patients normal bacterial flora
- Minimize the adverse effects of antibiotics
- Minimize the emergence of antibiotics resistant strains of bacteria
- Cost effectiveness

Roles and Responsibilities Of Pharmacist In Antibiotic Prophylaxis

- According to an ASHP statement, a pharmacist involved in the ASP has responsibilities to **promote optimal antimicrobial use, to reduce the transmission of infections and to educate other healthcare professionals, patients, and the public.**
- Educating the pharmacy staff on the risks of antibiotic resistant and emphasis on their role in **helping to reduce the prevalence of resistance** is an essential issue. Pharmacists have to accept these challenges to ensure that antibiotics are used appropriately even during the self-medication.
- The addition of a dedicated antibiotic pharmacist to an active team has been shown to benefit patients by reducing medication errors and length of hospital stay, encouraging oral medication, and ensuring appropriate drug choice.
