Respected Sir,

Subject: Letter for requesting Permission to Conduct seminar regarding: -

We Are writing this letter to request permission to conduct a seminar in the Seminar Hall for one day 30/08/2022. We wish to conduct the seminar on **EXCEPTIONS AND LIMITATIONS OF PATENT RIGHTS**. We believe that this will be a very informative session that many students will wish to attend.

We request you to kindly permit to conduct training program as this would be a great opportunity for Students to learn all about **EXCEPTIONS AND LIMITATIONS OF PATENT RIGHTS** that would help to shape the students.

Looking forward for your approval.

Thank you

Dr. N.SENTHILKUMAR,

ABOUT THE TOPIC

EXCEPTIONS AND LIMITATIONS OF PATENT RIGHTS

Patent rights is considered as an incentive for investment in innovative activities and the production of knowledge, allowing the enforcement of the full scope of the exclusive rights in all circumstances may not always meet the ultimate goal of the patent system to enhance the public welfare. Therefore, in order to strike the right balance between the interests of the right holders, third parties and the public, the scope of the enforceable exclusive rights may be set under national patent laws according to certain exceptions and limitations to patent rights that have been reserved for decision by individual countries.

Private and Non-commercial Use Exception

The exclusive rights conferred by a patent do not allow private use or monopoly over commercial activity. If a patentee is neither using nor vending the invention for profit, the Government has the power to grant a license, known as Compulsory License (CL), to a third party to use the patented invention so as to restrict the rights of the patentee for the purpose of preventing the abuse/ misuse of the rights by the property holder and to prevent the negative effect of such action on the public.

Experimental / Scientific Use Exception

The experimental use exemption is incorporated under Section 47 of the Act. Under sub section 3 of the said section, the grant of a patent is subject to the condition that any product or process, in respect of which the patent is granted, may be made or used by any person for the purpose merely of experiment or research including the imparting of instructions to pupils.

Regulatory-use/ Prior-use Exemption

This exemption is also referred as Bolar Provision and is a statutorily created exemption to patent rights that allows the manufacturers of generic drugs to undertake steps reasonably related to the development and submission of information required for obtaining marketing approval anywhere in the world in respect of a patented product without the consent of the patentee. Some countries permit the generic drug manufacturers to use the technology of a patented drug to generate data and to demonstrate bioequivalence that would assist in the regulatory or marketing approval of the generic product, while the patent is still in force.

Exhaustion of Patent Rights

The *Doctrine of Exhaustion or First Sale Doctrine* refers to the exhaustion of the exclusive rights of the patent holder once the patented invention is sold without any restriction. As per this Doctrine, the first unrestricted sale of a patented item exhausts the patentee's further control over that particular
