DEPARTMENT OF PHARMACOGNOSY **REPORT**

**SEMINAR ON –INTELLECTUAL PROPERTY RIGHTS – AN OVERVIEW AND
IMPLICATION IN HERBAL INDUSTRY**

VENUE: SEMINAR HALL

DATED: 29/10/2022

RESOURCE PERSON

DR. S.THENMOZHI, M.PHARM., PH.D.
VELLALAR COLLEGE OF PHARMACY, ERODE

No. of students enrolled: 352

No. of students certified: 351

No. of students certified in our institution : 74

On Oct.29.2022, the Department of Pharmacognosy at JKKMMRF's SampooraniAmmal College of Pharmacy held a seminar on Intellectual Property Rights – An Overview and Implication in Herbal Industry in the Seminar hall. The seminar was attended by 352 students and was certified by the college.

The seminar began with an introduction to Intellectual Property Rights – An Overview and Implication in Herbal Industry and its importance in herbal industry. The speaker discussed the various procedures and protocols regarding IPR on Herbal Industry. The speaker also covered the steps involved in implication of patenting procedures regarding novel herbal formulations and its manufacturing procedures. The students participated actively in the seminar, asking questions and engaging in discussions, received feedback from the speaker.

Overall, the seminar was well-received by the students and provided them with valuable knowledge and skills in enforcement of IP rights. The Department of Pharmacognosy at JKKMMRF's SampooraniAmmal College of Pharmacy is committed to providing high-quality education and training to its students and plans to hold similar seminars in the future.

DEPARTMENT OF PHARMACOGNOSY

ABOUT THE COURSE

Intellectual property rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property. IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is a recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application. IPR is prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity. Each industry should evolve its own IPR policies, management style, strategies, and so on depending on its area of specialty. Pharmaceutical industry currently has an evolving IPR strategy requiring a better focus and approach in the coming era.

Competition in the global pharmaceutical industry is driven by scientific knowledge rather than manufacturing know-how and a company's success will be largely dependent on its R&D efforts. There is high cost attached to the risk of failure in pharmaceutical R&D with the development of potential medicines that are unable to meet the stringent safety standards, being terminated, sometimes after many years of investment. For those medicines that do clear development hurdles, it takes about 8-10 years from the date when the compound was first synthesized.

Different forms of IPR demand different treatment, handling, planning, and strategies and engagement of persons with different domain knowledge such as science, engineering, medicines, law, finance, marketing, and economics. Each industry should evolve its own IP policies, management style, strategies, etc. depending on its area of specialty. Pharmaceutical industry currently has an evolving IP strategy. Since there exists the increased possibility that some IPR are invalid, antitrust law, therefore, needs to step in to ensure that invalid rights are not being unlawfully asserted to establish and maintain illegitimate, albeit limited, monopolies within the pharmaceutical industry. Still many things remain to be resolved in this context.
