REPORT

Seminar on Current Scenario of Herbal Antioxidants

RESOURCE PERSONS

Dr. N. Balakrishnan M.Pharm., Ph.D

Dr. R.Arivukarasu., M.Pharm., Ph.D

S.A. Raja College of Pharmacy, Vadakankulam

KMCH College of Pharmacy, Coimbatore

No. of students enrolled : 305

No. of students certified : 305

No. students certified in our Institution : 36

On June.07.2018, the Department of Pharmacognosy at JKKMMRF's Sampoorni Ammal College of Pharmacy held a seminar on Current Scenario of Herbal Antioxidants in the Seminar hall. The seminar was attended by 305 students and was certified by the college.

The seminar began with an introduction to Current Scenario of Herbal Antioxidants and its importance in research studies. The speaker discussed important health effects, the efficient extraction methods of natural antioxidants, appropriate assessment of antioxidant activity as well as their main resources from food and medicinal plants are drawing great attention in food science and nutrition.

The speaker also covered the important health effects, the efficient extraction methods of natural antioxidants, appropriate assessment of antioxidant activity as well as their main resources from food and medicinal plants are drawing great attention in food science and nutrition.

The students participated actively in the seminar, asking questions and engaging in discussions and received feedback from the speaker.

Overall, the seminar was well-received by the students and provided them with valuable knowledge and skills in enforcement of IP rights. The Department of Pharmacognosy at JKKMMRF's Sampoorni Ammal College of Pharmacy is committed to providing high-quality education and training to its students and plans to hold similar seminars in the future.

Tamil Nadu, PIN:638183.

Respected Sir,

Subject: **Requesting Permission to conduct Seminar –regarding.**

With due respect, we humbly request you to grand permission to conduct a Seminar in the Seminar Hall during

7/6/2018 on Current scenario of Herbal Antioxidants. It will be a very informative course for our students.

Kindly do the needful. We will be grateful to you sir.

Thank you

**Dr. N. SENTHILKUMAR,
PRINCIPAL,**

DEPARTMENT OF PHARMACOGNOSY

2018-2019

CIRCULAR

This is inform to the Students that the following Seminar program can be conducted by the Department of Pharmacognosy, JKKMMRF's ANNAI JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY and it will be commenced as per the schedule:

Course Name	Schedule	Venue	Resource Person
Current scenario of Herbal Antioxidants	7/6/2018	SEMINAR HALL	Dr. V.R. Ravikumar & Dr. N. Balakrishnan,

All the above mentioned students must enrol and actively participate in the course without fail.

NOTE: Certificates should be issued to all the students after completion of the course and examination.

Dr. N.SENTHILKUMAR,
PRINCIPAL

ABOUT THE COURSE

Natural antioxidants are widely distributed in food and medicinal plants. These natural antioxidants, especially polyphenols and carotenoids, exhibit a wide range of biological effects, including anti-inflammatory, anti-aging, anti-atherosclerosis and anticancer. The effective extraction and proper assessment of antioxidants from food and medicinal plants are crucial to explore the potential antioxidant sources and promote the application in functional foods, pharmaceuticals and food additives. The present paper provides comprehensive information on the green extraction technologies of natural antioxidants, assessment of antioxidant activity at chemical and cellular based levels and their main resources from food and medicinal plants.

Considering their important health effects, the efficient extraction methods of natural antioxidants, appropriate assessment of antioxidant activity as well as their main resources from food and medicinal plants are drawing great attention in food science and nutrition. To improve the extraction efficiency of antioxidant components from plant materials, several green non-conventional methods have been developed for reducing operational time and usage of organic solvents, such as ultrasound-assisted extraction, microwave-assisted extraction, enzyme-assisted extraction, pressurized liquid extraction, supercritical fluid extraction, high hydrostatic pressure extraction, pulsed electric field extraction and high voltage electrical discharges extraction. Moreover, to further assess the antioxidant capacities of extracts from natural products, especially those frequently consumed by people, different evaluation assays have been developed, e.g., Trolox equivalence antioxidant capacity (TEAC) assay, ferric ion reducing antioxidant power (FRAP) assay, oxygen radical absorbance capacity (ORAC) assay, inhibiting the oxidation of low-density lipoprotein (LDL) assay, cellular antioxidant activity assay, etc. These assays have been used for ranking the antioxidant plants and recommending best antioxidant foods for consumption. This review is aimed at summarizing the extraction methods of natural antioxidants, assessment methods of antioxidant activity and their main resources from food and medicinal plants.

Enzymes have the properties of high specificity and high efficiency. Enzyme-assisted extraction (EAE) is a potential green extraction method because of the mild extraction conditions and barely any effect on the environment. The enzymes could degrade the compositions and destroy the structural integrity of plant cell wall, which enhance the release of bioactive compounds.

Antioxidants derived from food and medicinal plants have been increasingly investigated for their various nutritional function and health benefits. In this review, the extraction methods of natural antioxidants, assessment methods of antioxidant activity as well as their main resources from food and medicinal plants are summarized. The non-conventional techniques described have potential to replace or enhance existing extraction techniques due to the less extraction time, energy consumption, and usage of harmful organic solvents, as well as higher extraction yields to recover antioxidant compounds from food.
