DEPARTMENT OF PHARMACEUTICAL CHEMISTRY

REPORT

Workshop-Herbal Nano Technology

VENUE: SEMINAR HALL DATED: 23/07/2021

RESOURCE PERSON

Dr.A.SUMATHI,M.PHARM,PH.D

Nandha college of Pharmacy , Erode

No. of students enrolled: 116

No. of students certified: 116

No. of students certified in our Institution : 33

Introduction:

The Workshop on Herbal Nano Technology was held on 23 July 2021 at JKKMMRF's Annai JKK Sampoorani Ammal College of Pharmacy. The Workshop was organized by the Department of Pharmacy, and a total of 160 students participated. The purpose of the workshop was to provide attendees with an introduction to the basics of Herbal Nano Technology software as a tool for analyzing and organizing qualitative data. At the end of the workshop, all attendees received a certificate of completion.

Objectives:

The main objectives of the Seminar were to:

- Knowledge and use of plants as herbal medicines has occurred in various populations throughout human evolution, beginning when man was learning to select plants for food, and to relieve ailments and diseases.
- However during the second half of the twentieth century, especially in the western world, herbal medicines were gradually replaced by allopathic medicines.
- Allopathic treatments are currently more widely used than traditional medicines, especially in developed countries.
- According to the World Health Organization, 80% of people in developing countries depend on traditional medicinal practices to meet and/or supplement their basic health needs.

Participants:

The Workshop was open to all students at JKKMMRF's Annai JKK Sampoorani Ammal College of Pharmacy, and a total of 116 students participated. The attendees represented a range of academic disciplines within the field of pharmacy, including pharmacology, pharmaceutical chemistry, and pharmacy practice. Most of the attendees had some prior experience with qualitative research, but some were new to the field.

had some prior experience with qualitative research, but some were new to the field.

Format:

The seminar was structured as a combination of lectures, group discussions, and hands-on exercises. The lectures were led by an experienced researcher with expertise in complement system an overview, and the hands-on exercises were led by a trained facilitator. The seminar was held over one full days, with breaks in between to allow attendees to rest and ask questions.

Content:

The seminar covered a range of topics related to complement system. On the first day, attendees learned about the different types of qualitative data, including interview transcripts, focus group transcripts, and observational field notes. They also learned about the different approaches to analyzing qualitative data, including coding, memorying, and categorizing. On the second day, attendees learned how to know complement system to organize and analyze their qualitative data, including importing data, coding text, and creating visualizations.

Evaluation:

At the end of the seminar, attendees were asked to complete a short evaluation form to provide feedback on the seminar. Overall, the evaluations were very positive, with most attendees rating the workshop as "excellent" or "good." Attendees commented that the lectures were clear and well-organized, and that the hands-on exercises were helpful in providing a practical understanding complement system.

Conclusion:

Overall, the seminar on complement system was a success. A total of 350 students participated, and all attendees received a certificate of completion. The positive feedback from attendees suggests that the workshop met its objectives and was well-received by the participants. The skills and knowledge gained from the seminar will be valuable to the students as they continue their studies and pursue careers in the field of pharmacy.

Recommendations:

Based on the evaluations and feedback from attendees, we recommend offering similar seminar in the future to continue to build capacity in complement system at JKKMMRF's Annai JKK Sampoorani Ammal College of Pharmacy. It may also be helpful to consider offering more advanced seminar for those who have already completed the basic workshop and are looking to further develop their skills.

Respected Sir,

Subject: Letter for requesting Permission to Conduct Workshop regarding

We Are writing this letter to request permission to conduct a workshop in the Workshop for two days, on **23/07/2021**. We wish to conduct the workshop on **Herbal Nano Technology**. We believe that this will be a very informative session that many students will wish to attend.

We request you to kindly permit to conduct training program as this would be a great opportunity for Students to learn all about Herbal Nano Technology that would help to shape the students.

Looking forward for your approval.

Thank you

Circular

This is to inform all the students of our college that the Workshop on Herbal Nano Technology for the academic year 2020-2021 will be commenced on 23/07/2021 for all the batches. Hence request all the interested candidates to register for the workshop.

Course Name	Schedule	Venue	Resource Person
Herbal Nano Technology	23/07/2021	SEMINAR HALL	Dr.A.Sumathi Nandha College of Pharmacy Erode.

All the above mentioned students must enrol and actively participate in the course without fail.

NOTE: Certificates should be issued to all the students after completion of the course and examination.

ABOUT THE TOPIC

HERBAL NANO TECHNOLOGY

INTRODUCTION

Nanotechnology is a field of applied science and technology which aims to develop devices and dosage forms in the range of 1 to 100 nm. The applications of nanotechnology for treatment, diagnosis, monitoring, and control of biological systems have recently been referred to as nanomedicine. The nanocarriers have been made of safe materials, including synthetic biodegradable polymers, lipids, and polysaccharides.

RECENT DEVELOPMENT

The nanoparticles have come forward as the capable approach in drug delivery systems for the well-organized delivery of drugs utilized in the treatment of various diseases such as cancer by crossing the reticuloendothelial system, enhanced permeability and retention effect, and tumor-specific targeting.

TOXICITY ISSUES

The change in the physicochemical and structural properties of engineered nano-sized materials with a decrease in size could be responsible for a number of material interactions that could lead to toxicological effects

All over the world, the research has been going on herbal remedies and natural products. The development of herbal remedies in the drug delivery system in a number of institutes is being carried out at basic and clinical trial levels. The only requirement is to develop the better systems for the proper delivery of such drugs at the sites and in the whole body in the doses may also fascinate some potential research groups and potentially create attention-grabbing results.
