SEMINAR - Symposium On Intellectual Property Rights

VENUE: SEMINAR HALL DATED: 31/01/2019

RESOURCE PERSON:

Dr.P.Vaijanthi Mala.,M.PHARM,PH.D

ASSISTANT PROFESSOR,SSM COLLEGE OF PHARMACY
JAMBAI

No. of students enrolled:400

No. of students certified:400

No. of students certified in our institution:35

On January 24, 2019, the Department of Pharmaceutical chemistry at JKKMMRF's Sampoorani ammal College of Pharmacy held a seminar on Symposium On Intellectual property Rights in the Seminar hall. The seminar was attended by 400 students and was certified by the college.

The seminar began with an introduction to intellectual property rights and its importance in research studies. The speaker discussed the different types of intellectual property rights, including structured, semi-structured, and unstructured, and the pros and cons of each type.

The speaker also covered the steps involved in designing a intellectual property rights, including defining the research objectives, identifying the target population, selecting the questionnaire format, and writing and pretesting the questions.

The students participated actively in the workshop, asking questions and engaging in discussions. They also had the opportunity to practice designing their own and received feedback from the speaker.

Overall, the seminar was well-received by the students and provided them with valuable knowledge and skills in intellectual property rights. The Department of Pharmaceutical chemistry at JKKMMRF's Sampoorani ammal College of Pharmacy is committed to providing high quality education and training to its students and plans to hold similar seminar in the future.

Respected Sir,

Subject: Letter for requesting Permission to Conduct seminar regarding:-

We Are writing this letter to request permission to conduct a seminar in the Seminar hall on **31/01/2019..** We wish to conduct the seminar on **Symposium On Intellectual Property Rights..** We believe that this will be a very informative session that many students will wish to attend.

We request you to kindly permit to conduct training program as this would be a great opportunity for Students to learn all about **Symposium On Intellectual Property Rights** that would help to shape the students.

Looking forward for your approval.

Thank you

ABOUT THE TOPIC

Symposium On Intellectual Property Rights

Questionnaire design is the process of creating a set of questions for a survey or other research project. A well-designed questionnaire can help to ensure that the data collected is accurate, relevant, and reliable. There are several key considerations to take into account when designing a questionnaire, including the purpose of the survey, the target audience, the type of questions to ask, and the format of the questionnaire.

One of the first steps in questionnaire design is to determine the purpose of the survey. This will help to guide the development of the questionnaire and ensure that it is focused on the right issues. It is also important to consider the target audience for the survey, as this will help to determine the type of questions that should be included.

The type of questions asked in the questionnaire is also an important consideration. There are several types of questions that can be used in a questionnaire, including closed-ended questions, open-ended questions, and rating scales. Closed-ended questions are those that have a limited set of responses, such as multiple choice or yes/no questions. Open-ended questions allow respondents to provide their own responses, which can be more informative but may be harder to analyze. Rating scales allow respondents to rate a particular item or concept on a scale, such as from 1 to 5.

The format of the questionnaire is also important, as it can affect the response rate and the quality of the data collected. There are several options for questionnaire format, including paper and pencil, online, and telephone surveys. Each of these formats has its own advantages and disadvantages, and it is important to choose the format that is most appropriate for the target audience and the purpose of the survey.

In summary, questionnaire design is an important process that requires careful planning and consideration. By taking the time to design a well-crafted questionnaire, researchers can ensure that they are able to collect reliable and relevant data that will be useful in their research or other projects.

REPORT : Through connection and collaboration , the Symposium will ultimately serve a larger goal: facilitating the exchange of ideas and advancing education on the role of intellectual property in economic and technological development.
