DEPARTMENT OF PHARMACOLOGY

REPORT

WORKSHOP ON ROUTE OF ADMINISTRATION

VENUE: SEMINAR HALL

DATED:30/11/2020

RESOURCE PERSONS:

1. Mr.G.Thamotharan, M.PHARM.,

ASSOCIATE PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

2. Mr.G.Muthukumar., M.PHARM.,

ASSOCIATE PROFESSOR, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL
COLLEGE OF PHARMACY, KOMARAPALAYAM.

No. of students enrolled: 264

No. of students certified: 260

No. of students certified in our Institution : 19

Objective

The route of administration is the way through which the dosage form is administered into the body for treatment of various diseases and disorders.. These soft skill development program provides additional knowledge to the students other than their academic knowledge.

Learning outcomes:

- Describe the different methods by which injectable medicines are given.
- Describe the pharmacokinetic implications of various Routes of Administration.
- Describe the advantages and disadvantage of various Routes of Administration.

Respected Sir,

Sub: Requesting permission to conduct seminar (**Route of administration**) regarding:-

With due respect, we kindly request you to grant us permission to conduct a seminar on **09/11/2020 to 10/11/2020 in the topic Workshop on Route of administration**. We believe this will be informative session and useful for our students.

Kindly consider the above, we will be grateful to you sir.

Thank you

Dr. N. Senthilkumar,
PRINCIPAL,

**JKK MUNIRAJAH MEDICAL RESEARCH FOUNDATION
ANNAI JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY,
ETHIRMEDU, KOMARAPALAYAM - 638 183.

CIRCULAR

2020

This is inform to the students that the following soft skill development course can be conducted by the Department of Pharmacology, JKKMMRF'S ANNAI JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY, KOMARAPALAYAM and it will be commenced as per the schedule:

Course Name	Date	FN	AN	Venue	Resource Person
Workshop on Route of administration	09/11/2020 to 10/11/2020	I B.PHARM	II & III PHARM.D	SEMINAR HALL	Mr.G.Thamotharan & Mr.G.Muthukumaran

All the above-mentioned students must enrol and actively participate in the course without fail.

NOTE: Certificates should be issued to all the students after completion of the course and examination.

Workshop on Route of administration

Introduction

This certificate program is designed to provide a concrete theoretical foundation and accurate knowledge on different actions and side effects of various medications. The program also teaches about various routes of medication administration and the skills required to properly administer different medications through particular routes including oral route (pills/liquid), nose drops, eye drops, ear drops, suppositories, topical, transdermal, etc. The program emphasizes upon critical thinking and reflective practice, holistic care and cultural diversity/sensitivity.

Objectives

The theoretical component of the program is designed to facilitate the learner's knowledge of medications and their effects on patients. Students will explore the pharmacology, classifications, mechanisms of action, and side effects of medications. The impact of medications on various diseases and lab results will be explained.

Factors determining route of administration are as follows:

1. Drug characteristics like state of drug (solid/liquid/gas), and other properties of drug such as its solubility, stability, pH, and irritancy.
2. Clinical scenarios such as emergency or regular treatment.
3. Patient conditions like unconscious state, or if patient is experiencing diarrhea or vomiting.
4. Age.
5. Comorbid diseases.
6. Patient/doctor choice.
7. Rate and extent of absorption of the drug from different routes.
8. Effect of digestive enzymes and first-pass metabolism on the drug

The route of administration of a medication directly affects the drug bioavailability, which determines both the start and the duration of the pharmacological effect. Some considerations must be taken into account when designing a drug dosage form: (1) the intended route of administration; (2) the amount or dose to be administered; (3) the anatomical and physiological characteristics of the site of absorption, such as membrane permeability and blood flow; (4) the physicochemical properties of the site, such as pH and osmotic pressure of physiological fluids; and (5) the potential effect of the medication over the site of administration.

Routes of drug administration can be divided broadly into two categories: local and systemic. Systemic route includes enteral route which further comprises oral and rectal (drug is directly administered into the gastrointestinal tract [GIT]), whereas parenteral route comprises sublingual (under the tongue), inhalation (into bronchi) and injection. Further, injection includes intravenous (IV, into the vein), intramuscular (IM, into the muscle), and subcutaneous (SC, under the skin).
