**DEPARTMENT OF PHARMACEUTICAL CHEMISTRY**

**REPORT:**

In view of the urgency the covid 19 outbreak the world health organization has much focused on rapid activation of research and development activities in herbal and modern systems of medicine. There are no. of medicinal plants like ASVAGANDHA ( withania somnifera ), GUDUCI ( Tinospora cordifolia ).

**SEMINAR-MEDICINAL PLANTS FOR TREATMENT OF COVID-19**

**VENUE: SEMINAR HALL DATED: 18.06.2021**

**RESOURCE PERSON**

**DR.P. BALAN, M.PHARM, Ph.D**

ASSOCIATE PROFESSOR, ERODE COLLEGE OF PHARMACY, ERODE.

**No. of students enrolled: 400**

**No. of students certified: 400**

**No. of students certified in our institution : 36**

On 18<sup>th</sup> June 2021, the Department of Pharmaceutical Chemistry at JKKMMRF's Annai JKK Sampoorani Ammal College of Pharmacy held a Seminar on **MEDICINAL PLANTS FOR TREATMENT OF COVID-19** in the Seminar hall. The workshop was attended by 400 students and was certified by the college.

The Seminar began with an introduction to **MEDICINAL PLANTS FOR TREATMENT OF COVID-19** and its importance in research studies. The speaker discussed the different types of questionnaires, including structured, semi-structured, and unstructured, and the pros and cons of each type.

The speaker also covered the steps involved in designing a questionnaire, including defining the research objectives, identifying the target population, selecting the questionnaire format, and writing and pretesting the questions.

The students participated actively in the workshop, asking questions and engaging in discussions. They also had the opportunity to practice designing their own questionnaires and received feedback from the speaker.

Overall, the workshop was well-received by the students and provided them with valuable knowledge and skills in questionnaire design. The Department of Pharmaceutical Preparations at JKKMMRF's Annai JKK Sampoorani Ammal College of Pharmacy is committed to providing high-quality education and training to its students and plans to hold similar Seminars in the future.

**Respected Sir,**

**Subject: Letter for requesting Permission to Conduct workshop regarding:-**

We Are writing this letter to request permission to conduct a workshop in the Seminar hall on **18.06.2021**. We wish to conduct the workshop on **MEDICINAL PLANTS FOR TRATMENT OF COVID-19**. We believe that this will be a very informative session that many students will wish to attend.

We request you to kindly permit to conduct training program as this would be a great opportunity for Students to learn all about **MEDICINAL PLANTS FOR TRATMENT OF COVID-19** that would help to shape the students.

Looking forward for your approval.

Thank you

  
Yours sincerely,

**Dr. N. SENTHILKUMAR,**

## ABOUT THE TOPIC

### Introduction

The emergence of a new corona virus, known as the SARS-CoV-2 has initiated a pandemic of COVID-19 (World Health Organization, 2020). More than 31 million infections with at least 960,000 COVID-19 associated deaths were reported by September 23, 2020. Since new discovered evidence by both clinicians and researchers globally have helped shed some light on the disease pathogenesis and the nature of the virus itself. The availability of new information subsequently fed policy changes on transmission prevention strategies as well as development of preventative vaccines and therapeutic drug candidates.

### Medicinal Plants in COVID 19: Efficacy, Safety, and Research Gaps

In the research of phytomedicine, it is common to observe multiple pharmacological properties from a single plant. It is now well understood that a single plant may contain a wide range of phytochemicals, making ethno pharmacology research both full of possibilities yet challenging . Overall, these selected interventions of interest discussed here can be broadly categorized into those with 1) antiviral, 2) anti-inflammatory, 3) immunomodulatory effects, and more often 4) a combination of these effects, based on available evidence for efficacy.

### Perspective: Developing Herbal Medicine for COVID-19

One year into the pandemic, it has become apparent that developing an effective antiviral against the SARS-CoV-2 is challenging due to the virus infectivity and disease course. Viral life cycle modelling studies suggested that early administration of a highly potent antiviral is needed to effectively curb the infection and preserve host cells. This number also coincides with the average number of days for peak viral load to occur and symptoms onset, making it a challenge for timely administration of antivirals in community spreading. Though there have been many claims on antimicrobial properties of the selected medicinal plants discussed here, only one medicinal plant, neem, demonstrated preliminary in silico evidence of antiviral effects specific towards the SAR-CoV-2. Currently, the antiviral remdesivir is approved by the U.S Food.

### Conclusion

In conclusion, the medicinal plants discussed here collectively exhibited pleiotropic effects which can potentially provide a multimodal approach via antiviral, anti-inflammatory, and immunomodulatory effects in COVID-19 management. At present, it is evidently challenging to pool data from published studies due to variation in extracts selection and a lack of well-reported standardisation data of the investigated formulation
