DEPARTMENT OF PHARMACEUTICAL CHEMISTRY

REPORT

WORKSHOP –RESEARCH METHODOLOGY

VENUE: SEMINAR HALL DATED: 3/1/2019 & 4/1/2019

RESOURCE PERSONS:

1. Dr.Durai Anand Kumar, M.PHARM, Ph.D

&

2.Dr.Yuvaraj, M.PHARM, Ph.D

JSS COLLEGE OF PHARMACY
OOTY.

No. of students enrolled:250

No. of students certified:250

No. of students certified in our institution: 36

On January 3/1/2019 & 4/1/2019 the Department of Pharmacy Practice at JkkMMRF's Sampoorniammal College of Pharmacy held a workshop on Research methodology ; nature, purpose of study, design & data type in the Seminar hall. The workshop was attended by 250 students and was certified by the college.

The seminar began with an introduction to methodology ; nature, purpose of study, design & data type and its importance in research studies. The speaker discussed the different types of methodology ; nature, purpose of study, design & data type including structured, semi-structured, and unstructured, and the pros and cons of each type.

The speaker also covered the steps involved in methodology ; nature, purpose of study, design & data type , including defining the research objectives, identifying the target population, selecting the methodology ; nature, purpose of study, design & data type format, and writing and pretesting the questions.

The students participated actively in the workshop, asking questions and engaging in discussions. They also had the opportunity to practice designing their own methodology ; nature, purpose of study, design & data type and received feedback from the speaker.

Dr. N.SENTHILKUMAR,

Respected Sir,

Subject: **Letter for requesting Permission to Conduct workshop regarding:-**

We are writing this letter to request permission to conduct a workshop in the Seminar hall on 3\1\2019 and 4\1\2019. We wish to conduct the seminar on **Research methodology: Nature ,purpose of study, design & data type**. We believe that this will be a very informative session that many students will wish to attend.

We request you to kindly permit to conduct training program as this would be a great opportunity for Students to learn all about **Research methodology: Nature, purpose of study, design & data type** that would help to shape the students.

Looking forward for your approval

Thank you

Yours sincerely,

**Dr. N. SENTHILKUMAR,
PRINCIPAL,**

Circular

This is to inform all the students of our college that the seminar on **Research methodology : nature, purpose of study, design & data type** for the academic year 2018-2019 will be commenced on **3/1/2019 and 4/1/2019** for all the batches. Hence request all the interested candidates to register for the seminar

Course Name	Schedule	Venue	Resource Person
Research methodology: nature, purpose of study , design & Data type	3/1/2019 & 4/1/2019	SEMINAR HALL	Dr.Durai Anand Kumar,m.pharm,phD & Dr.yuvaraj,m.pharm,phD

All the above mentioned students must enrol and actively participate in the course without fail.
NOTE: Certificates should be issued to all the students after completion of the course and examination.

ABOUT THE TOPIC

Research Methodology: Nature, purpose of study, design & data type

Research Design

A research design also called a research strategy, is a plan to answer a set of questions (McCombes, 2019). It is a framework that includes the methods and procedures to collect, analyze, and interpret data. In other words, the research design describes how the researcher will investigate the central problem of the research and is, thus part of the **research proposal**.

Characteristics of Good Research Design

1. Purpose statement (the central research problem)
2. Data collection and analysis
3. Statistical method to analyze data
4. Settings for the study
5. Timeline
6. Probable objections
7. Validating the data

Good Research Design?

There are several ways to see that the study is designed well at a glance. Here are four main characteristics that make for good research design:

- **It is neutral.** Naturally, setting up a study comes with a measure of assumptions, which is why there is a hypothesis. However, good research design comes into play when the results obtained are as neutral and as objective as possible. It should allow the researcher to analyze and interpret the data that is free of any bias.
- **It is valid.** The design of the research also indicates the tools and techniques by which to measure results. If the design is sound, these tools will be correct and appropriate for the job, which will be defined as those that can help a researcher in measuring the results.
- **It is reliable.** Research design, when done well, can afford research that generates similar results every time it is performed. This means that a good research design creates an opportunity to form standards to collect and analyze results.
