REPORT

Workshop on Ecopharmacognosy -A Philosophical approach

RESOURCE PERSONS

Dr.S.Manokaran,,M.Paharm., Ph.D

The Erode College of Pharmacy,

Dr. N. Balakrishnan,,M.Pharm., Ph.D

S.A.Raja College of Pharmacy

No. of students enrolled: 320

No. of students certified: 320

No. of students certified in our Institution : 34

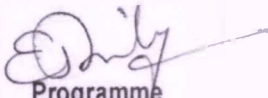

On Dec.20..2019, the Department of Pharmacognosy at JKKMMRF's Sampoorni Ammal College of Pharmacy held a seminar on Workshop on Ecopharmacognosy -A Philosophical approach in the Seminar hall. This seminar was attended by 320 students and was certified by the college.

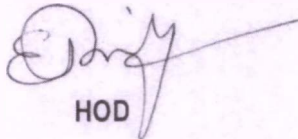

The seminar began with an introduction to Plant based drug Practice on contagious diseases and its importance in research studies. The speaker discussed the different varieties of plant species and its usage in various contagious diseases.

The speaker also covered the steps involved in the proper compounding of the various plant formulations and its method of preservation and usage.

The students participated actively in the seminar, asking questions and engaging in discussions and received feedback from the speaker.

Overall, the seminar was well-received by the students and provided them with valuable knowledge and skills in enforcement of IP rights. The Department of Pharmaceutical chemistry at JKKMMRF's Sampoorni Ammal College of Pharmacy is committed to providing high-quality education and training to its students and plans to hold similar seminars in the future.

Respected Sir,

Subject: Requesting Permission to conduct workshop -regarding

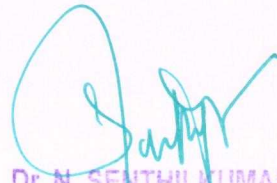

With due respect, we humbly request you to grant permission to conduct a workshop in the Seminar Hall during **14/10/2019-15/10/2019** on **Ecopharmacognosy - A Philosophical approach**. It will be a very informative course for our students.

Kindly do the needful. We will be grateful to you sir.

Thank you

Yours sincerely,

DEPARTMENT OF PHARMACOGNOSY

2019-2020

CIRCULAR

This is inform to the Students that the following Workshop program can be conducted by the Department of Pharmacognosy, JKKMMRF's ANNAL JKK SAMPOORANI AMMAL COLLEGE OF PHARMACY and it will be commenced as per the schedule:

Course Name	Schedule	Venue	Resource Person
Workshop on Ecopharmacognosy - A Philosophical approach	14/10/2019 to 15/10/2019	SEMINAR HALL	Dr. N. Balakrishnan, & Dr. S. Manokaran,

All the above mentioned students must enrol and actively participate in the course without fail.

NOTE: Certificates should be issued to all the students after completion of the course and examination.

ABOUT THE COURSE

Ecopharmacognosy is defined as the study of sustainable, biologically active, natural resources. As a philosophical approach, it provides a conceptual framework for developing new strategies and new scientific perspectives which may improve future global food and health care product accessibility and assure beneficial outcomes. Ecopharmacognosy may apply in developing new medicinal products may be developed, based on sustainability and the use of integrated technologies.

Although from a medicinal agent perspective, plants remain a primary source of global health care, these resources are not being pursued by major pharmaceutical companies as sources of new agents, and essentially all tropical diseases, as well as most microbially based diseases, remain outside the scope of their drug discovery programs. Countries and regions therefore must address their own drug discovery needs for "local" and some global diseases. In addition, the cost of drug importation is so high that development of local resources, i.e. traditional medicines, may be the only rational alternative approach.

At the same time, network pharmacology is exploring the many diverse effects of both individual and complex natural products at the gene level, and this is offering new opportunities to rethink and restructure the core, long-standing, Western, magic bullet philosophy to drug discovery. Other ecopharmacognosy changes underway include the computer-aided design of natural product derivatives, based on molecular docking, which is providing targetable enzyme substrates, and remote sensing technologies which can assess natural materials non-invasively for critical constituents as a part of rethinking quality control strategies in the field.

Furthermore, there are the hyphenated chromatographic and spectroscopic procedures to quantitatively analyze single and multicomponent plant mixtures for bioactive markers to enhance quality control and, thereby, patient care. The relationship of these evolving approaches will serve as practical examples to the philosophies of ecopharmacognosy. In summary, with respect to health care, ecopharmacognosy poses the long-term practical question for drugs, "How Green is Your Medicine?"

STUDENT FEEDBACK FORM

NAME OF STUDENT:

COURSE :

SEMINAR TOPIC :

REGISTRATION NO:

YEAR & SEMESTER:

DATE & TIME:

1. Overall, how satisfied were you with this seminar?

- Very satisfied
- Satisfied
- Neutral
- Dissatisfied
- Very dissatisfied

2. How clear were the ideas and concepts we presented?

- Extremely clear
- Very clear
- Moderately clear
- Not very clear
- Not at all clear

3. What percentage of the information was new to you?

- 100%
- 75%
- 50%
- 25%
- 0%

4. How informative did you find our seminar?

- Extremely Informative
- Very Informative
- Moderately Informative
- Not very informative
- Not informative at all
